PLUS LINE DESIGNATION

DESIGNATION PRODUCT LEGEND

	Flue Pipe	EN 1856-2	T600	N1	W	V2	L80100	G450NM
Product description								
Reference standard								
Temperature class <i>The number indicates the max. temperature</i>								
Pressure class N1 = negative pressure; P1 = pressure								
Condensate resistance W = can operate in the presence of condensate;	D = can operate only dry							
Corrosion resistance V1-V2-V3 = passed the respective corrosion of Vm = did not undergo the corrosion test, but the material is included in the table of per and the type and thickness are indicated								
Material specifications The first 3 figures (L80) indicate the type of mat The second 3 (100) the thickness of the metal	terial		_					
Soot-fire resistance $(G = yes, O = no)$ The number represents the or	listance in millimetres from	inflammable mai	terials	-
